

# HAZUS User of the Year!

## 2008 3rd Quarter

Congratulations to Cynthia Quigley, the 2008 3rd Quarter HAZUS User of the Year! Ms. Quigley works with the Riverside County, California Fire Department—Office of Emergency Services.

Ms. Quigley played an integral role in collecting data for the Federal Emergency Management Agency funded Riverside County Essential Facilities Risk Assessment (RCEFRA) Project.

Ms. Quigley spear-headed comprehensive data collection efforts for police stations, fire stations and Emergency Operation Centers throughout the County, ensuring that HAZUS Level 2 data was collected for each and every facility.

The resulting database will be used to estimate potential losses in two earthquake and 3 flood scenarios, and provide important risk assessment results to support the city's and county's hazard mitigation planning efforts.

FEMA recognizes Cynthia Quigley as a HAZUS User of the Year because of her determination, dedication and expertise related to the HAZUS methodology.

# Congratulations!
