

Heartland HAZUS User Group (HHUG) Monthly Conference Call December 16, 2010, 2:00 PM

Meeting Attendees

Shanna Micheal

Sheila Dale

Eric Coughlin

Arnold Radloff

April Bowman

Sue Evers

Meeting Notes

- Shana congratulated Arnold on his HAZUS presentation to students for Northeast Community College GIS Day, Norfolk NE Nov. 16th, 2010. Arnold went on to talk about presentations he has submitted for the Nebraska GIS Conference in April 2011. He also has a poster presentation submitted. He has also requested to have HAZUS pamphlets inserted into the conference participant folders.
- HAZUS MR-5 has been released. No one has received their copy yet. Shanna & Arnold have both ordered the software. The ordering process is much easier than it used to be. Users can order it through the website now. It can work on Windows 7. Annual Losses is no longer an option in MR-5.
- There was some discussion about new ESRI licensing functionality where users can check out ArcGIS licenses (for a remote system not connected to the floating license manager) for a limited amount of time.
- Arnold talked about a nice tool he uses called License Finder which has functionality similar to the License Manager Tool, but the License Finder tool can be installed on the user's PC. The tool lists who has what licenses checked out, and when they checked the licenses out.
- Next Meeting is January 20, 2011 at 2:00 PM CST.

Meeting concluded at 2:26 PM
